KINGDOM 1886 · KINGSHOT

Transfer Portal Guide

How a player's transfer request becomes a committed recruit, and who does what along the way.

VISITOR
Anyone with a Player ID
No account. Reads the public pages and sends a transfer request.

MEMBER
Approved recruiter
Uses the dashboard, prospects, transfer cycles and the requests inbox.

ADMIN
The first account to sign in
Everything a member does, plus approving people, roles and the audit log.

The journey of one transfer

1 **The player sends a request** · VISITOR
On the **Transfer Request** page the player types their Player ID and taps **Look up**. The server fetches their name, kingdom, power, alliance and TC level, so nothing can be made up. They then enter transfer passes (0–99), the window they plan to move in, the kind of alliance they want, whether they have spoken to anyone in 1886, an optional Discord name and note, and press **Send**.

2 **Members are told** · AUTOMATIC
A live pop-up ("New transfer request from …") appears for every signed-in member, and the amber count on the **Requests** button goes up. If the site owner has set it up, a Discord message or email with a link to the inbox is sent too.

3 **A member reviews it** · REQUESTS INBOX
The card shows the player's details and answers. **Add to prospects** creates a prospect in the right cycle with status Not Contacted and keeps their answers in its notes. **Dismiss** moves it to Past. A dismissed request can be moved back.

4 **The prospect is worked** · DASHBOARD ROSTER
Give it a recruiter, an invite type (Special, Ordinary or Open) and an alliance. Move the status as talks go on: Not Contacted, In Talks, Considering, Committed or Rejected.

5 **The cycle is tracked and closed** · DASHBOARD
Watch the countdown, invite slots left and committed power. Export a CSV copy before the window opens and archive the cycle once it ends.

The public pages

Rules
15 pact violations, the three trials, what is still allowed, how to report, appeals within 48 hours.

Alliance Directory
Tags and names (D86, W86, A86, KTA, T86). A link opens the full list with R5 leaders and bear trap times.

Assignments
4 Fortresses, 10 Sanctuaries, picked in order of power. Confirm with your R5 before rallying.

Transfer Request
Free, no login. Limits: 5 sends per 10 minutes per device, 3 per day per Player ID.

Top bar. Rules, Alliance Directory, Assignments and Transfer Request stay on every public page. The gold **Member login** pill appears everywhere except the home page, which already shows the login form.

Getting in MEMBERS

1 · Request access
On the home page choose **New here? Request access**. Enter email and a password of 8+ characters. Confirm your email if asked.

→

2 · Choose your name
On first login type the name teammates and the audit log will show (up to 40 characters). Change it later in ⋯ → **My name**.

→

3 · Wait for approval
Until an admin approves you, you see “Waiting for approval”. Press **Check again**. The very first account becomes admin.

Forgot your password? Use **Forgot password?** on the sign-in card, then **Send reset link**. Open the emailed link and choose a new password. The same message shows whether or not the email has an account.

Reading the dashboard

AREA	WHAT IT SHOWS
Cycle selector	The transfer window you are viewing (● active, 🗂 archived). Everything below follows it.
Countdown	Live timer: Starts in · Ongoing, ends in · Ended, with a progress line. Cycles run on UTC.
Reminder bar	Appears when the latest cycle has ended or ends within 3 days, or players are waiting for a next cycle. **Create next cycle** pre-fills the form.
Pipeline	Committed power, average per player, and five status tiles. Click a tile to filter the roster.
Invites	Special, Ordinary and Open slots used versus total. Bars turn amber at 90% and red when over. Rejected prospects free their slot.
Needs attention	**Follow up**: open prospects unchanged for 3 days. **No recruiter**: open prospects with nobody assigned.
Alliance assignments	Players heading to each alliance, how many committed, and incoming power. “Unassigned” collects the rest. Click a line to filter.
Requests button	Opens the inbox. The amber number counts new requests, live.
⋯ menu	Members · My name · Audit Log (admin) · Light/dark switch · Sign out.

Working the roster

Find people
- **Search** checks name, ID, kingdom, recruiter, status, alliance, TC, assignment, invite and notes.
- **Filters** button: Status, Assigned alliance, Invite type, Recruiter, Needs attention. The badge shows how many are on.
- **Click a column header** to sort; click again to reverse.
- **Clear filters** resets everything.

Change things
- **Assigned to, Invite, Status** are dropdowns in the table and save instantly.
- **Click a row** to open Prospect Details, then **Update Prospect**.
- 🗑 deletes after a confirmation. Prefer Rejected to keep history.

+ Add Prospect
Type a Player ID and press 🔍 **Auto Lookup** to fill IGN, kingdom, power, alliance and TC level (type them by hand if it fails). Power accepts **120,500,000** or **153.8M**. Then set Status, Invite type, Recruiter, **Assign to alliance** (OPEN, D86, W86, A86, KTA, T86 or your own tag) and Notes. Player ID and IGN are required.

Import and export
⬇ **Export Cycle to CSV** downloads the open cycle (safe to open in Excel). 📄 **Template** gives a blank CSV with the right columns. ⬆ **Import JSON/CSV** adds rows to the open cycle after a confirmation. Limits: 2 MB and 2,000 rows; each row needs a Player ID and IGN.

Transfer cycles MANAGE CYCLES BUTTON

Create

- **+ New cycle:** name, start and end date, and invite totals. Presets: **Ordinary kingdom 3 / 35 / 20** and **Leading kingdom 0 / 20 / 10** (Special / Ordinary / Open).
- **Next cycle ›:** pre-fills the next number, a start 8 weeks after the latest cycle (or 6 with **6 weeks later**), a 7-day window and the same totals. Check it against the in-game announcement.

Maintain

- **Open** switches the dashboard to that cycle.
- ✎ **Edit** changes name, dates and invite totals.
- **Archive / Reactivate** moves it between the lists.
- 🗑 **Delete** also deletes its prospects, and says how many first.

The requests inbox: where each request goes

THE PLAYER CHOSE	WHEN YOU PRESS ADD TO PROSPECTS
A specific window	The prospect is created in that cycle.
Next window	It goes to the earliest cycle starting after the request date. If none exists the button reads **Create next cycle first**.
Not sure yet	It goes to the cycle picked in the selector at the top of the inbox (shown when you have more than one active cycle).

Two tabs: **Incoming** and **Past** (each with a count). Filter chips appear when requests target different windows. The page updates live. If a player already has a request waiting, a second one is refused.

ADMIN ONLY

Members & access (··· → Members)

- **Approve** or **Reject** people waiting. A badge shows how many.
- Change a role between Member and Admin, or **Remove** access (not yourself).
- Regular members only see a list of names.

ADMIN ONLY

Audit Log (··· → Audit Log)

- Every create, edit and delete is recorded by the database, with who and when.
- Search, filter by cycle, type and action, **Refresh**, **⬇ CSV**, **Load older entries** (100 at a time).

Quick reference

LIMIT	VALUE
Player ID	3–20 digits
Transfer passes	0–99
Password	8+ characters
Display name	40 characters
Prospect notes	2,000 characters
Invite totals	0–1,000 each
Follow-up alert	3 days idle

STATUS	MEANING
Not Contacted	Nobody has reached out yet
In Talks	A recruiter is speaking with them
Considering	They are deciding
Committed	Counts toward committed power
Rejected	Frees the invite slot

Each cycle, a recruiter's routine

- [ ] Check the reminder bar; create the next cycle if missing.
- [ ] Give every "No recruiter" prospect an owner.
- [ ] Keep Status, Invite and Assigned to current.
- [ ] Export a CSV before the window opens.
- [ ] Add or dismiss every incoming request.
- [ ] Contact everyone under "Follow up".
- [ ] Watch that no invite type goes over its total.
- [ ] Archive the cycle when it ends.
